Professional Summary

Gen AI QA Automation Lead | 5 + Years of Experience

Proven expertise in implementing solutions for QA Automation across diverse industries, with a strong focus on efficiency & scalability. I have experience on:

- Tosca Agentic AI Automation and Tosca MCP.
- Analysing business requirements to develop, execute, and optimize Tosca automation test scripts for Web & Mainframe application testing, emphasizing modularity and reusability.
- Successfully delivering Tosca to Selenium Java migration POC for leading banking client.
- Designing & implementing a small sized Selenium WebDriver automation framework to streamline metrics collection.
- Successfully delivering small-size Gen AI Enablement programme *for leading insurance client across units. Trained 70+ QAs and Business Analysts on Gen AI as per client demand on client network.*
- Capturing GitHub Copilot Telemetry metrics to assess Gen AI adoption impact.
- Publishing Code quality comparison reports: evaluating Baseline vs Copilot adoption metrics alongside subjective survey analysis to guide Gen AI Adoption strategies.
- Measuring and tracking sprint productivity metrics, including Capacity & Velocity, to refine Gen AI enabled agile development processes.
- ETL Testing, GCP application and infrastructure testing.
- Publishing structured Daily & Weekly Status Reports, facilitating transparent project tracking and stakeholder communication.
